108 million fewer jobs, and $367 billion a year to the United States.

The world story, ten regions

saro-saravanan.github.io/ai-workforce-sim

THE WORLD · 2040

108M

fewer jobs than there would have been, out of 2.95 billion · −3.7%

BY REGION · EMPLOYMENT VS NO AI

Same clock, different lags.

- United States −7.0%
- European Union −5.8%
- India −3.9%
- China −1.9%

WHY THE WORLD NUMBER IS SMALLER

India, China and the rest of Asia carry most of the weight and see the frontier later.

WHERE THE AI INCOME GOES · 2040

More concentrated than the jobs.

- United States $367B
- China $102B
- European Union $83B
- Taiwan $63B

WHO PAYS IT · $651B IN 2040

Mostly employers.

- 65% employers replacing tasks with software
- 23% consumers’ subscriptions and services
- 9% tools that speed up workers
- 3% AI-made content

BIGGEST GDP GAINS

Taiwan and Korea, through chip exports.

THE CAVEAT

Outside the U.S. the occupation mix is the American one tilted by income.

Regional differences are the mechanism, not local data. Help wanted.

Which region are you in, and does the mechanism ring true?
