

13.5 million fewer jobs. 2.9 million layoffs.

Those are not the same number.

saro-saravanan.github.io/ai-workforce-sim

THE JOBS LEDGER COUNTS POSITIONS

13.5M

fewer in 2040 than there would have been · United States, central assumptions

THE PEOPLE LEDGER COUNTS PEOPLE

11.0M

found the job they had, or would have had, gone

HOW THEY LOST IT

Mostly a door that never opened.

-
- 7.8M positions never offered to new entrants
-
- 2.9M layoffs
-
- 0.3M gig and freelance hours cut

WHERE THEY WENT

Most found other work.

-
- 9.2M found other work
-
- 1.0M left the workforce
-
- 137,000 unemployed in 2040

THE PEAK

489,000

extra unemployed at the 2034 peak. The unemployment rate barely moves. The cost is somewhere else.

WHY THE LEDGERS DIFFER

Someone who finds other work fills a position that would otherwise have gone to someone else.

A cut through attrition never makes the news.

Who is counting in your organisation?
